

ABSTRACT ON INNOVATION OF MOBILE BANKING IN BUSINESS AND INFORMATION TECHNOLOGY.

ENGLISH.

Mobile banking and banking applications are among the most significant innovations in the field of Business and Information Technology. This innovation allows customers to access banking services using mobile phones and internet-enabled devices without physically visiting banking halls. Mobile banking applications enable services such as fund transfers, bill payments, balance inquiries, loan applications, and online customer support. This innovation has improved efficiency, reduced operational costs for banks, enhanced financial inclusion, and increased customer convenience. In developing countries such as Kenya, mobile banking has transformed the financial sector by making banking services accessible to both urban and rural populations. This presentation discusses the evolution, components, benefits, challenges, and future prospects of mobile banking and banking applications in the business environment.

KISWAHILI.

Huduma za benki kwa njia ya simu na matumizi ya programu za benki ni miongoni mwa ubunifu muhimu katika nyanja ya Biashara na Teknolojia ya Habari. Ubunifu huu unawawezesha wateja kupata huduma za kifedha kwa kutumia simu za mkononi bila kutembelea benki moja kwa moja. Programu za benki huruhusu huduma kama uhamishaji wa pesa, ulipaji wa bili, kuangalia salio la akaunti, na kuomba mikopo. Ubunifu huu umeongeza ufanisi, kupunguza gharama za uendeshaji kwa benki, na kuboresha ujumuishaji wa kifedha hasa katika nchi zinazoendelea kama Kenya. Uwasilishaji huu unaeleza maendeleo, faida, changamoto, na mustakabali wa huduma za benki kwa njia ya simu.
